

METALS BY FINISH & FUNCTION

There are three main reasons for the application of specific coatings or finishes to metals: decorative, environmental and wear resistance. This table presents a quick guide for the many options offered and their function for Hendrick's most popular metals:

Aluminum (AL), Stainless Steel (SS) and Carbon Steel (CS)

	Decorative Finish	Environmental or Galvanic Corrosion Barrier	Improved Wear Resistance
Polish/Brush	AL, SS		AL, SS
Electro Polish	SS		
Plating	AL, SS, CS	AL, SS, CS	AL, SS, CS
Passivate	SS	SS	
Anodize	AL	AL	AL
E-Coat	AL, SS, CS	AL, SS, CS	
Powder Coat	AL, CS	AL, CS	AL, CS
Fluoropolymer Coat	AL	AL	
Silk Screen	AL, SS, CS		

Hendrick offers additional metals and finishes other than those listed. RoHS compliant finishing options can also be provided. Be sure to discuss your specific needs with a Hendrick Sales Rep.

In operation since 1876, the Hendrick family of companies offers a depth of experience that allows us to provide a large scope of metal services to a broad variety of industrial and architectural markets. All locations are ISO-9001 QMS certified and employ lean manufacturing processes to deliver quality products at lower costs.

» *Hendrick Manufacturing* specializes in fully-integrated perforated and fabricated metal products.

» *Hendrick Screen* offers unique Profile Bar , wedge wire, and looped screen products.

» *Hendrick Architectural Products* provides metal solutions for interior and exterior applications.
